## The Equity Club launches new initiative with € 900 million program

We are thrilled to announce the official launch of **#TEC2**, a **club deal** program led by **Roberto Ferraresi** and **Filippo Penatti**, in partnership with **Mediobanca** Wealth Management.

#TEC2 aims to create a distinctive and innovative ecosystem where the private capital of a network of **Italian entrepreneurs** supports the industrial projects of other ambitious entrepreneurs willing to open the capital structure of their companies.

TEC2 follows the first initiative, TEC1, with €500 million now fully invested. Initially launched with a target of €750 million, TEC2 has raised €1.2 billion of **soft commitments** from Italian entrepreneurs and their family offices. The program has therefore been increased to **€900 million** with the goal to invest in private equity over a time horizon of 4/5 years, offering great flexibility in governance and capital structure.

The common denominator of our investments is the focus on entrepreneurs and their development projects, supporting them with the expertise of a seasoned team with track record in the world of international private equity.

With the support of an independent team of professionals and experts such as Giancarlo Aliberti and Valeria Lattuada, we are ready to turn ambitions into tangible realities.
